

DEGAUSSERS DESIGNED FOR DATA CENTERS

Proton Data Security is the world's leading manufacturer of degaussers and data destruction products. With over 30 years of experience in the data security industry, our line of degaussers ensure that sensitive data is erased in accordance with recognized standards

(NIST, HIPAA, FACTA, PCI DSS, GLBA, PIPEDA, IRS, GDPR, DoD, etc.) and is forensically unrecoverable.

All of our degaussers are designed to operate in high-security data center environments and are manufactured in **ISO 9001** certified facilities. Most of our equipment has been tested and approved by the **National Security Agency (NSA)** and U.S. Department of Defense (DoD) for sanitizing Top Secret / Classified data.

Our patented technologies and understanding of the constantly changing data security industry allows us to provide customers with the latest solutions for permanently erasing data.
